

UTHUKELA DISTRICT MUNICIPALITY

WATER AND SANITATION TARIFFS

FINANCIAL YEAR 2020/21

LEGISLATIVE BACKGROUND:

Tariff-setting is a pivotal and strategic part of the compilation of any budget. When rates, tariffs and other charges were revised, local economic conditions, input costs and the affordability of services were taken into account to ensure the financial sustainability of the Municipality.

Since 2015 the District and the rest of the country experienced severe drought due to the heat and lack of rain which resulted to water shortages, the impact from that situation affected the municipality. The effects from the drought are still felt by the municipality as it affected the collection rate as water had to be shut down and distributed by water tankers. Municipality is still recovering from this situation.

The core function of the municipality is water and sanitation which is considered to be the basic needs for human beings and the constitution says they are basic human rights. The municipality has a difficult task of setting tariffs which are affordable to all consumers and the same time must be cost reflective taking into account all cost associated with the end product.

National Treasury continues to encourage municipalities to keep increases in rates, tariffs and other charges as low as possible.

Discounting the impact of these price increases in lower consumer tariffs will erode the Municipality's future financial position and viability. As mentioned earlier services are failing to break even.

It must also be appreciated that the consumer price index, as measured by CPI, is not a good measure of the cost increases of goods and services relevant to municipalities. The basket of goods and services utilized for the calculation of the CPI consist of items such as food, petrol and medical services, whereas the cost drivers of a municipality are informed by items such as the cost of remuneration, bulk purchases of electricity, petrol, diesel, chemicals etc. The current challenge facing the Municipality is managing the gap between cost drivers and tariffs levied, as any shortfall must be made up by either operational efficiency gains or service level reductions. Within this framework the Municipality has undertaken the tariff setting process relating to service charges as follows

Tariff the cost of the provision of general services. Determining the effective tariff is therefore an integral part of the municipality's budgeting process. The 8.1 % increase in tariffs is set to be cost reflective and ensure protection of basic level services to provide free water to indigent recipients

Below are the proposed water services tariffs for the financial year 2020/2021 these tariffs exclude VAT.
