

## **PUBLIC NOTICE**

The uThukela District Municipality wishes to inform residents / consumers that a Revenue Enhancement Project has been launched:

1. To conduct assessments of the functionality of pre-determined water meters;
2. To verify and validate property owners information on the Municipality's financial system; and
3. To prioritise and cost the interventions required to be performed by the Municipality.

This project will only be undertaken in certain areas of the District and the Project Team will visit the selected areas during the next few months in order to collect the data. The Team will then compile a Report on the findings that will be used to improve the current water meter billing system.

We encourage residents to assist and co-operate with the Project Team as and when they visit your area.
