Minister of Cooperative Governance and Traditional Affairs (CoGTA), Mr Velenkosini Hlabisa, led the uThukela Service Delivery and Governance Roundtable in Dongala Boutique, Ladysmith. The Minister was joined by KZN CoGTA MEC Rev. Thulasizwe Buthelezi including local leadership, business fraternity, and social partners to address municipal performance and service delivery across the district.

This was the continuation of the work that was started by Minister Hlabisa to address many challenges in the district including water provision challenges. He therefore came to listen to the proposed solutions and also weigh in on how best these challenges can be resolved. Since August 2024 the Minister has been here, specifically, at Ekuvukeni to ensure that the basic human rights, which are water and sanitation, are being taken care of.

He was also here to harness practical insights from the business sector to shape a modern, fit-for-purpose local government system. A high-level panel discussion focusing on "Enhancing

Basic Service Provision for Businesses to Thrive: Experiences and Lessons" was set up. It brought together representatives from government, business, development institutions and civil society. The panel discussed the critical role of reliable basic services in supporting economic growth and creating an enabling environment for businesses.

The discussion highlighted that the effective and sustainable provision of essential services such as water, sanitation, electricity, roads and other critical infrastructure. This is fundamental to attracting investment, supporting existing businesses and stimulating local economic development. Small and emerging businesses are particularly vulnerable to unreliable services, as disruptions to water, electricity and road infrastructure can significantly increase operating costs and affect their ability to remain sustainable.

Water provision challenges emerged as one of the most critical concerns during the discussion. Panelists highlighted both the reliability of water supply and water

quality as important factors influencing business operations.

This reinforces the need for municipalities to prioritise investment in water infrastructure, preventative maintenance and sustainable water-resource management. Municipal billing was also identified as an area requiring attention. Accurate, transparent and efficient billing systems are therefore essential for strengthening confidence. It was said that none revenue water is a complex matter which must be dealt with. One cannot beat the none revenue water if the assets are unknown.

Minister Hlabisa reflected on the need to reposition municipalities as economic enablers through a differentiated funding regime, overseen by a competent and accountable leadership. "Communities expect tangible improvements, not promises," said Minister Hlabisa. He then announced the Steering Committee to restore reliable water supply across in the district. The Committee will coordinate implementation, monitor progress and manage risk, and will set up a recovery tracker to monitor infrastructure projects. maintenance and complaint resolution.

UTHUKELA DISTRICT RECEIVES WATER TANKERS TO PROVIDER WATER RELIEF TO ITS RESIDENTS

To many residents of UThukela District, challenges of water shortages are set to become a thing of the past. This after UThukela District Municipality received about 15 water tankers from Umgeni-UThukela Water under the auspices of Section 63 Intervention. This intervention was welcomed by the UThukela District Mayor, Inkosi NB Shabalala at the Ladysmith Water Treatment Plant.

This initiative offers financial relief to the municipality, as the water tankers are provided free of charge and come with drivers. UThukela District then added driver's assistants for each truck, and drivers will also be provided with maps to guide them through their trips until they familiar-

ise themselves with the area. Each tanker has a capacity of 18,000 litres and is expected to provide much needed relief to communities experiencing intermittent water supply due to ongoing challenges in the district.

The water tankers complement ongoing efforts by the municipality to address water related issues in the district. All areas, urban and rural, were allocated with a water tanker that will distribute water from all water treatment plants. In his remarks, Inkosi Shabalala said that they are grateful to Umgeni-UThukela Water for their great efforts.

He said that they had requested Umgeni-UThukela Water as water

agency that was allocated to UThukela by the Department of Water and Sanitation. "Amongst the interventions that will be implemented by Umgeni-UThukela Water, these water tankers form part of it. They are going to be distributing water in the whole district of UThukela", the Mayor explained. Each tanker is scheduled to run about 190km per day, seven days a week.

The Mayor also hoped that with this intervention, all the challenges that the municipality has been facing, will be the thing of past from now onwards. These water tankers are an interim measure aimed at providing relief to communities while long-term and medium-term interventions are being implemented by the district municipality.

UThukela Warns Against Illegal Connections and Tampering With Meters

The UThukela District Municipality is actively cracking down on account defaulters and residents, businesses and government agencies who tamper with water meters. The municipality would like to issue a stern warning to all residents that bypassing meters, breaking municipal seals, or making illegal reconnections after a credit control disconnection are strictly prohibited criminal offences.

Any defaulter who resort to these methods will face immediate disconnections, heavy financial penalties, and criminal prosecution. There has been one recent instance where the Department of Education was caught bypassing our water meter. The department defaulted on their account, and a "trickle feed" restrictor was placed on the line.

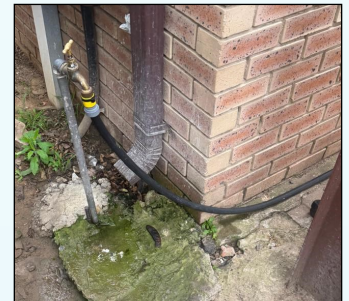

However, the municipal officials revisited the property and only to find that the consumer had illegally removed device, and bypassed the

supply line. In terms of Section 102 of the Local Government: Municipal Systems Act, 2000, the UThukela District Municipality is entitled to consolidate all outstanding amounts owed by the Department of Education to the municipality and to disconnect or restrict the provision of any or all services for non-payment.

The municipality acknowledges the importance of service delivery by the department and its schools. However, illegal activities cannot be tolerated in any given circumstances thereof. Unauthorised connections and tampering with municipal infrastructure compromise public safety, disrupt essential services, reduce water pressure and result in significant revenue loss, ultimately affecting service delivery to law-abiding citizens.

All customers are legally responsible for preventing unauthorized access to their

meters. Attempting to fix a faulty meter yourself or hiring a private plumber to alter it, constitutes illegal tampering because the meter remains municipal property. If a customer suspect they are being billed incorrectly, they must log an official query, record photo evidence with clear dates, and wait for authorized personnel rather than modifying the connection.

Any unauthorized connection constitutes a criminal offence

UThukela District Engages Vumbu Community On Water Supply Interventions

UThukela District Municipality recently held a community engagement with residents of Vumbu and surrounding areas in Ward 20 of Inkosi Langalibalele Local Municipality. The main purpose of this engagement was to provide an update on ongoing interventions aimed at improving water supply in the area.

The meeting, held at Vumbu Primary School, was attended by community members, traditional leadership led by Induna Vilakazi, municipal officials, and Ward Councillor Cllr Mlele. During the engagement, residents

with the installations. Additional delays were caused by administrative processes, paperwork and payments.

Mr Zikalala assured the community that the municipality has introduced alternative measures to ensure residents receive water without waiting for the Eskom connection. "We will utilise generators to power the boreholes while awaiting the permanent electricity supply. Water tanks will be installed from 20 July 2026, to enable the community to start receiving water. The borehole system is expected to be fully operational at the beginning of August 2026," he said.

He further confirmed that a service provider has been appointed to relocate and elevate the steel water tank as part of the project. Once completed, the upgraded infrastructure will improve water storage capacity and enhance the reliability of water supply to the community. The municipality also confirmed that the project includes three production bore-

holes, the installation of water storage tanks, and the 250,000-litre steel water tank.

Vumbu community attending the event

All this is aimed at strengthening water security for Vumbu and surrounding communities. Residents were assured that the municipi-

ality will closely monitor the implementation of the remaining work to ensure the project is completed within the planned timeframe. UThukela District Municipality remains committed to accelerating water infrastructure projects and providing sustainable access to clean drinking water for all communities.

UThukela District Officials during the event

sought clarity on the progress of the borehole production project that commenced last year and questioned why the work had stalled.

Responding to the concerns, municipal official PMU Manager, Mr Sanele Zikalala explained that the project experienced delays due to Eskom power connection challenges, which prevented the service provider from continuing

UTHUKELA MAYOR BREAKS GROUND ON NEW TOILETS IN MCITSHENI

UThukela District Municipality, under the leadership of District Mayor Inkosi N.B. Shabalala, conducted the sod-turning ceremony for the construction of ventilated improved pit latrines (VIP toilets) in Mcitsheni, Ward 7 of Alfred Duma Local Municipality. The project follows a direct appeal from elderly residents who approached the Office of the Mayor seeking assistance with adequate sanitation.

The elderly women explained that while their community has access to water, they were still without proper household toilets. Responding to the concerns raised by the elderly residents, uThukela District Municipality has committed to ensuring that toilets are constructed in the

ward, with a special allocation of these toilets to the elderly women who approached the Mayor's Office.

The remaining toilets will be distributed to other households in the community according to identified needs. Speaking during the sod-turning, Mayor Inkosi Shabalala emphasised that the municipality had listened to the concerns of the community and was determined to respond with practical service delivery.

this is not the first sanitation intervention undertaken in the ward. Last year, uThukela District Municipality provided 100 toilets to the same ward, demonstrating the municipality's continued commitment to improving sanitation and restoring dignity to residents.

Importantly, the project will also contribute to local economic opportunities. Rather than relying on machinery for the construction work, the toilets will be constructed manually, creating employment opportunities for 10 local people for the duration of the project. Construction is expected to take approximately two months.

The municipality remains committed to working with communities to identify and address service-delivery challenges, particularly those affecting vulnerable residents such as elderly people. The Mcitsheni project is a practical demonstration that when residents raise legitimate concerns, government must listen, respond and deliver.

Mayor Shabalala addressing the audience

Community members who attended the event

UTHUKELA LEADS JOINT COMMUNITY AWARENESS ON ILLEGAL IMMIGRATION

The UThukela District Municipality, led by Mayor Inkosi NB Shabalala, together with its local municipalities, South African Police Service (SAPS) and government stakeholders, held a joint community awareness programmes on illegal immigration at Ezakheni in Alfred Duma Municipality, Khethani in Okhahlamba and Wembezi in Inkosi Langalibalele over a period of three days. This initiative followed calls for action from civic organisations against undocumented immigrants. It also sought to educate communities on immigration laws, strengthen enforcement of municipal by-laws, and promote cooperation between government, law enforcement and residents.

Addressing the community, Alfred Duma Municipality Mayor Cllr Zama Sibisi said all enforcement must take place within the confines of the law. He reaffirmed the municipality's commitment to enforcing by-laws, conducting regular business inspections with the SAPS, and ensuring all traders possess valid permits. He also urged residents to report unlawful business activities and highlighted municipal programmes sup-

porting local economic development.

Okhahlamba Local Municipality Mayor, Cllr Vika Mlotshwa did not mince his words when he made it clear that the community don't want any illegal immigrants in their places of residence. "Only those with correct papers are welcomed. We have conducted a campaign against illegal migrants in the past and we found that most of these people are in the country illegally. And they will always say they are still waiting for their documents to be processed by the department of Home Affairs. It cannot be like that forever", said Mayor Mlotshwa.

Inkosi Langalibalele Local Municipality Mayor, Cllr Mduduzi Myeza called for a unified approach to by-laws enforcement across the district, stressing that all businesses must comply with legal requirements. "The issue of illegal foreign nationals in our country is troubling us all. This calls for a united front against this issue. Ours is to listen to your voice as what needs to be done to address this urgent matter but we must also do it within the framework of the law. We need

not take the law in our own hands," said Mayor Myeza.

There are circulating reports alleging that one Malawian man killed a woman because of their disagreement related to their relationship. A Pakistani national is also alleged to have raped a child in Wembezi. There is also a case of a landlord who chased away an illegal Pakistani migrant who was renting out his house. Mayor Myeza committed that his municipality will deliver the stock to the homeowner to enable him to start his own business.

Mayor Shabalala encouraged residents to formally report any allegations of misconduct or criminality to the relevant authorities, emphasizing that government can only act effectively when incidents are officially reported. He also assured residents that they are welcome to report any challenges affecting their communities directly to his office, where every matter raised will be diligently followed up. The Premier said inspections at workplaces and businesses across the province will be intensified to identify employers contravening immigration and labour laws.

Inkosi Shabalala speaking during the programme

UTHUKELA DISTRICT CELEBRATES WOMEN AND 70 YEARS OF COURAGE, RESILIENCE AND EMPOWERMENT

Mama Ndlunkulu with Manager Municipal Health Services: Gugu Mazibuko

UThukela District Municipality successfully hosted its Women's Day Commemoration 2026 at the Municipal Boardroom, bringing together municipal leadership, employees, Councillors and inspiring guest speakers. The purpose was to celebrate the achievements, resilience and invaluable contributions of women in building stronger families and communities.

This meaningful gathering provided a platform for reflection, empowerment and inspiration, with speakers sharing powerful messages centred around hope, health, confidence, personal wellbeing and women empowerment. The programme commenced with a warm welcome by the General Manager: Social Ser-

vices, Mrs LP Motaung, who set the tone for a day of meaningful engagement and celebration.

This was followed by remarks on behalf of the Municipal Manager, delivered by Ms GPP Mazibuko, who described women as individuals of substance, strength and resilience. She reminded women of the importance of supporting one another and recognizing their own capabilities. "We are clothed in strength and dignity. As women, we face challenges almost every day, but through prayer we overcome them. Let us go back to God, support each other as women and know our capabilities," Ms Mazibuko said.

A powerful message of encouragement was also delivered by Mama Ndlunkulu, Cllr SV Shabalala, who

reminded women of their importance, influence and ability to shape their own futures. She emphasized that women possess the power to build, create and bring their visions to life, and therefore must know themselves and clearly understand what they want to achieve. "There is nothing that can defeat you when your mind is focused on what you want to achieve. Everything begins in the mind", she alluded.

Mama Ndlunkulu further highlighted the significant role played by women within families, describing women as the "neck that supports the head of the family." She encouraged women to remain prayerful, believe in themselves and recognize that they are conquerors.

Women were also urged to confidently pursue leadership positions and opportunities wherever they may be found. "Wherever you are, fight for that position," she said.

UTHUKELA DISTRICT ACCELERATES WATER DELIVERY WITH FITTY PARK PHASE 2 PROJECT

UThukela District Municipality has reached another significant milestone in its ongoing efforts to improve access to reliable water services, with the successful completion of Phase 1 of the Fitty Park Water Supply Project. District Mayor Inkosi NB Shabalala, officially handed over the Fitty Park Water Supply Project, during a sod-turning ceremony held in Ward 28 of Alfred Duma Local Municipality.

The ceremony was attended by the District Speaker Cllr TY Nqubuka, Municipal Manager Mr LS Jili, Senior UThukela District employees, local councillors, izinduna and members of the community, marking another significant step towards improving access to reliable water for residents in the area. Inkosi Shabalala said the municipality had visited the area several times to understand why residents were still struggling to access water despite the presence of existing water infrastructure.

area, but there were challenges with the pumps, which meant that water could not reach other communities as intended," said Mayor Shabalala. The municipality subsequently deployed its technical teams to investigate alternative water sources. Drilling was undertaken at various locations, eventually identifying a suitable site with sufficient groundwater to support approximately five wards in the area

The project will benefit approximately 6,575 households and create over 40 job opportunities. The project included the construction of approximately 120 kilometres of bulk and reticulation pipelines, ranging from 25mm to 250mm in diameter, as well as a 365kℓ steel reservoir and associated infrastructure. The completed project has benefited approximately 6,575 households and created 47 job opportunities during its implementation.

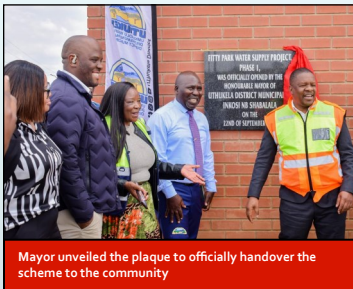

Building on the achievements of Phase 1, the District Municipality has introduced ILZ Consulting (Pty)

Ltd as the appointed service provider for the implementation of Phase 2. This project will be implemented over a period of 12 months and is expected to benefit approximately 1,733 households, while creating approximately 15 job opportunities during implementation.

Water infrastructure being addressed through the project includes: Ward 28: with 41 communal standpipes/taps, and an additional 26 taps; Ward 29: with 11 communal standpipes/taps; Ward 30: with 28 communal standpipes/taps and Ward 31: with 11 communal standpipes/taps.

Mayor Shabalala said the municipality expected the taps to provide water to communities and urged residents to report any interruptions immediately. "If there is no water, that matter must be attended to immediately. We cannot have infrastructure in place but communities continue to struggle to access water," said Mayor Shabalala.

The Mayor also raised concern over incidents of vandalism, including taps being removed or stolen. He called on communities to take ownership of the infrastructure and protect the water facilities delivered to them.

UTHUKELA LEARNER CROWNED JUNIOR PROVINCIAL COMMISSIONER

The UThukela District Commissioner, Major General Gonya together with the UThukela District Mayor, Inkosi NB Shabalala congratulated Awande Cebekhulu during the ceremony to officially announce him as the Junior Provincial Commander of KwaZulu Natal. The ceremony was held in the SAPS Ladysmith Boardroom on Monday, August 31. This is a youth leadership programme initiated by SAPS. It sought to give the skills in public speaking and mould the youth to become leaders.

Awande, a 15-year-old learner from Drakensberg Secondary School in Estcourt, represented the uThukela District with aplomb when he tackled violence facing learners and the youth in general during the finals held in University of KwaZulu Natal, Westville Campus. His awareness of the primary causes of bullying at schools,

the prevalence of dangerous weapons and substance abuse, coupled with proposed possible solutions, some of them 4IR-inspired, left the adjudicators with no option but to score him the highest. He is also expected to hold this title for a period of two years.

Congratulating the learner, Department of Education District Director Ms Poppy Mokoena said that this was a clear indication of a bright future for the youth of UThukela District. She said just last week they've launched a countdown towards final matric exam. "We extend our congratulations to our new Junior Provincial Commissioner for what he has achieved. You have brought honour to our district. The impact you make on people will go a long

way towards ensuring that they are taken care of", she said.

Major General Gonya was equally delighted with the success of Awande. He said they were proud that he was there to say with them that they were indeed proud for this young man for what he has done. "Pretty soon we are going to make use of him to go around the Province to mimic what the Provincial Commissioner does. If we have young people like him, we will stand up and count on them", Major General Gonya alluded.

The Mayor was so proud and impressed by the learner's courage and achievements. His words of encouragement were that, in order to succeed in life one must only think about good things. "You have an obligation to make a difference to yourself first, your family and your community", said Inkosi Shabalala.

Awande is flanked by Mayor Shabalala and General Gonya during the award handover ceremony

MAYOR INTRODUCES CONTRACTOR FOR LOSKOP WATER WORKS ABSTRACTION PROJECT

UThukela District Municipality has taken another significant step towards addressing water challenges in Wards 2, 3 and 4 of Inkosi Langa libalele Local Municipality, with the official introduction of a contractor for the expansion and completion of the Loskop Water Treatment Works. The engagement, held at the Loskop Water Treatment Works, formed part of the municipality's ongoing commitment to improving water infrastructure and ensuring sustainable access to clean and reliable water for communities.

During the event, UThukela District Mayor, Inkosi NB Shabalala, was accompanied by Inkosi Langa libalele Local Municipality Mayor, Cllr Myeza; UThukela District Deputy Mayor, Cllr MC Mkhize; Speaker, Cllr TY Nqubuka; Inkosi Langa libalele Local Municipality Speaker, Cllr Khumalo; Inkosi Mazibuko; Councillors and Administration officials. Their collective presence demonstrated strong collaboration between political leadership, traditional leadership in advancing service delivery and development for communities.

The Mayor of Inkosi Langa libalele Local Municipality, Cllr Myeza, expressed

appreciation to UThukela District Municipality for responding to the community's longstanding water challenges. He acknowledged the difficulties experienced by residents as a result of water shortages, which had previously sometimes led to community protests. Mayor Myeza welcomed the intervention and expressed confidence that the project would bring meaningful and lasting change to the affected communities.

Deputy Mayor, Cllr MC Mkhize, also conveyed his appreciation for the continued work and contribution of UThukela District Municipality towards community development. He also acknowledged the progress made in serving communities over the past five years and encouraged continued collaboration in improving the lives of residents. Meanwhile, Inkosi Mazibuko welcomed the intervention by UThukela District Municipality and expressed gratitude for the commitment to bringing much-needed services closer to the people.

Addressing the community, UThukela District Mayor, Inkosi Shabalala emphasized that leadership carries a responsibility to serve communities and respond meaningfully to their

needs. He highlighted the importance of servant leadership and ensuring that government interventions respond directly to the challenges faced by communities. The Mayor acknowledged the persistent water shortages experienced by communities, including Mqedandaba, and explained that the existing water infrastructure has come under increasing pressure due to population growth and increasing demand for water services.

The project will see the expansion and upgrading of the Loskop Water Treatment Works, with approximately R23 million allocated towards the development of the infrastructure. The project is expected to take approximately eight months to complete and will benefit more than 100 households. It is expected to create seven job opportunities for the local community. The appointed contractor, Maxode Contractors, is expected to commence construction activities within the next two weeks.

Mayor Shabalala further urged community members to take ownership of public infrastructure and refrain from vandalizing municipal property, stressing that infrastructure development can only bring lasting benefits if it safe.

UThukela District leadership at the event

MAYOR PROMISES PROTESTORS THAT ONGOING WATER CHALLENGES WILL BE RESOLVED

The UThukela District Mayor, Inkosi NB Shabalala recently addressed a handful of angry crowd of residents from Tsakane, Steadville and Acaciavale. Frustrated by intermittent water supply, protesters demanded an immediate solution to the ongoing water shortages in their areas of residence. On the list of their complaints, they made it clear that they want water restored now, and are not prepared to wait for long-term plans.

Residents insisted that urgent action was needed to address these challenges. These communities faced with prolonged water outages because of the ongoing challenges that are currently being experienced at Ezakheni Water Treatment Works (WTW). Amongst these challenges include failing pumping station as a result silt built into the sumps and reservoirs drop. Navigating this heated boardroom meeting, Mayor Shabalala tried to de-escalate tensions and provided actionable solutions.

The Mayor addressed the situation which was fueled by frustration over leaks, aging pipes, infrastructure vandalism, sewer spillages and water rationing. "We are trying our utmost best to ensure that every household has access to clean water all the time. However, the current water situation at Ezakheni water works is posing a serious challenge in terms of providing reliable water supply to communities. But we are working on resolving this matter once and for all", said the Mayor.

Inkosi Shabalala went on to say that the solution is to remove the silt from abstraction point now or build a new storage dam to draw raw water from. There's also a proposed long term plan of constructing a water treatment plant in Spioenkop which will be bigger than the Ladysmith WTW. This will allow for more water capacity to enable huge water volume distribution. This will complement the existing Ezakheni WTW infrastructure and will provide more water than what the current plant does.

At the plant, these communities were shown how the process of water flow through the system goes. They also witnessed the excavation of silt from the abstraction point. In the meantime, affected communities were allocated water tankers to fill water in their

homes as a short term solution

UTHUKELA DISTRICT WORKING TOGETHER WITH MACANDA COMMUNITY TO PROTECT SPRINGS AND SUPPLY WATER

Municipal Manager, Mr Jili addressing the community

Provision of safe and adequate water supply is among the most top priority in community welfare. As such, safe drinking is fundamental to improving standards of living for people. UThukela District Municipality, led by Municipal Manager Mr Langelihle Jili and officials visited Macanda area in Ward 3 of Okhahlamba municipality. This was to fulfill the mandate of UThukela which is to provide safe drinking water and hygienic sanitation facilities.

The meeting that was held at Sokesimbone High School where Mr Jili addressed the community of their being there. "We are here as per the Mayor's request to meet with you the community of Macanda to discuss issues related to water and service delivery. We all know that there's a spring protection programme that was undertaken by the UThukela District Municipality to supply water to the

community. We are working to ensure the community is assisted by all means to draw water from the springs", Mr Jili alluded. This area has been struggling with water shortages in recent years due to lack of access and inadequate water facilities.

To sustain local livelihoods and provide essential water resources for rural communities, it is crucial that natural springs in this area are protected. Access to potable water remains limited in the area. These springs are thus the safety net that allows rural people to continue to live and access water. The community has identified springs right up in the mountains and they have tried ways and means to distribute water. The same springs have abundant water and can supply the whole area and beyond.

This community was then assisted by the municipality with the required

equipment. UThukela committed to working together with the local community in their quest to draw and supply water in the area. The Municipal Manager commended this community for taking the initiative to improve their livelihoods. He then assured them that the municipality will ensure that this community receives all the required resources necessary to make it happen.

Speaking on behalf of the community, Mr Mdluli appreciated the support and assistance they received from the municipality. He also noted that the water infrastructure in his area is ageing. He pointed out that there's an unused water tank in the area that they deemed to be of great use for the community. Mr Jili then made a commitment to purchase and supply more equipment for this community to connect water right across the length and breadth of the area.

Some of the equipment donated by UThukela to assist this community with required material
